# Investment approach:

- Seek to outperform the VN30 Index by identifying the most attractive stocks within our coverage universe;
- The default holding period is 3-month. However, the portfolio is reviewed and reallocated in every first week of each month;
- Employ a risk-managed exit strategy that sets a stop loss of 15%;
- Use an equal-active-weight (with monthly rebalancing method) approach that allocates 100% of the portfolio to stocks that can also include VN30 index ETFs.
